(54) Title: CLAMSHELL-TYPE MOBILE TERMINAL WITH A BETTER ACCESS TO INPUT KEYS

WO 2004/086733 A1

(57) Abstract: The present invention relates to a clamshell-type mobile terminal (1) for a wireless communication system, with a lower casing (2) comprising a keypad with input keys, an upper casing (3) comprising a display, a hinge means (4) connecting the lower (2) and the upper casing (3) so that the lower and the upper casing can be folded onto each other, whereby the hinge means (4) is located and arranged so that in an opened state, the lower casing (2) lies above the upper casing (3) enabling an easy access to input keys located close to the hinge means on the lower casing.
